

On the evening of 23 May, this years' Sommerfest at Graduate Academy changed the courtyard of our house "Zur Rosen" at Johannisstraße into a colourful and swinging summer party.

The evening had everything, from sunshine to thunderstorm, an exciting Science Slam, a huge amount of "Hats Off!"-pictures to vote vor, and last but not least, a wonderful atmosphere with the delightful swing music of "Nils & The Swingsters feat. Franziska Höring".

The winner of the 7th Science Slam was: Ms. Chhavi Jain, of Leibniz Institute for Photonic Technology e.V Jena, with her Presentation "Let's put Light Behind Bars". The hat of Steffi Forman won the photo competition "Hats off!": Her colleagues made a lyrical text explaining the hat. The second prize went to Reinhard Geis, Henry Holland-Moritz was the lucky third winner in the "HatsOff!" competition.

Our heartfelt congrats to all winners of the evening! [Here](#) you can see some foto impressions and also the videos of this year's Science Slam competition.
