

Show your Research!

The Background

In the short film project "Show Your Research!" young scientists from the Friedrich-Schiller-Universität Jena present their scientific work and research life in Jena. The resulting films were shot from October 2017 to February 2018 under the professional supervision of Tilman Hesse, filmmaker, and under the direction of the Graduate Academy of the Friedrich-Schiller-University Jena.

The project tries to shed light on the diversity of research as well as the many personal and scientific stories behind the research projects in Jena.

The short films were funded by Stiftung Mercator as part of the project "Jena House for Young Researchers".

The films and their protagonists

New approaches in super-resolution imaging
Alexander Jügler und Benedict Diederich

You are what you eat - How a fungus is affected by its own dietary
Enrico Garbe

Placenta - ingest it? A scientific approach of using placenta-remedies during post partum
Sophia Johnson

Body-Mind-Relationship in Vajrayana Buddhism
Julia König

Graphs are everywhere

M. Ali Rostami

How frequent are planets around very hot and cold stars?

Silvia Sabotta

Microbial degradation of environmental pollutions

Martin Sperfeld
