

The vote for the photo competition "Hats off!" 2020 is closed and the winning hats have been chosen! With a great participation of more than 300 votes the hat of Thomas Siefke was chosen as the most beautiful, inspiring and creative doctoral hat. The base of the hat is a knight's helmet onto which a medieval castle has been mounted. By turning a crank, a knight can be moved on his daily quest within the castle. The hat of Martin Klapper has made second place, while the third place goes to the hat of Felix Weidinger.

The team of Graduate Academy would like to thank all for their active participation in this first virtual photo competition! An overview of the winning doctoral hats can be found [here](#).
