

Graduate Academy continues the qualification programme! There are Online Courses available now. Many of our trainers arranged their courses in a new online version, and we even got an extra course on "Managing Crisis", tackling the current situation from an individual perspective.

After registration, we will inform you how the workshop will be conducted. Participants that had already registered will be contacted and asked whether they want to participate in the online version of the workshop.

For any further courses in June, July and August, whether online or face-to-face, we will inform you as soon as possible.

The following online workshops are offered in English:
