

Leadership Skills

Trainer	Sabine Lerch
Language	English
Date	5 – 6 November 2012, 9.00 – 17.00 h
Location	Auditorium, »Zur Rosen«, Johannisstraße 13
Target group	interdisciplinary
ECTS	1.0

This workshop is designed for young scientists to provide them with basic theoretical and practical knowledge concerning leadership. Working together with other people in a cooperative way, understanding their motivation, bringing about solid decisions and influencing a group towards win-win goals are valuable skills for any leader. The participants will take steps to learn how to identify their own leadership type, clarify leadership ideals and behaviours, script successful meetings and discussions, listen to acquire complete information, empower staff, give constructive feedback and deal with conflicts.

Depending on the background and experiences of the participants, it may also be needful to train communication skills.
