Leadership Skills

27–28 January 2014, 9.00–17.00 h

Auditorium, „Zur Rosen“, Johannisstraße 13

This course is designed for young scientists to provide them with basic theoretical and practical knowledge concerning leadership in projects and teams.

Interactive exercises will help you to understand more about yourself being in a “leading” or “led” position. Working together with other people cooperatively in groups or teams, you will learn more about the driving forces (motivation), decision making and negotiating as valuable skills for any leader.

In discussions and exercises you will look at different leadership types and also learn about your own talents and behaviors regarding leadership.

You will practice various communication skills as active listening, paraphrasing, reflecting, constructive feedback and dealing with conflicts. There are no minimum requirements to take part in this course as anybody can be a leader tomorrow...
